

# ***BS 7671:2018+A2:2022 ELECTRICAL FORMS - NICEICONLINE***

Due to the changes in *BS 7671:2018+A2:2022* the model electrical forms in Appendix 6 have been updated. Accordingly, the NICEIC branded forms have also been updated and wherever possible NICEIC have simplified the form range and introduced a new form code for *BS 7671:2018+A2:2022* model forms.

This overview will highlight the major changes and list all the form types available on NICEIOnline.

## **Form types available**

**The following branded form types are available:**

- Approved Contractor (AC) Scheme branded
- Domestic Installer Scheme (DIS) branded
- Rented Sector (RS) Scheme branded
- Certifier of Construction (CoC) Scheme branded

**The branded forms available to certified businesses are:**

- Electrical Installation Certificate (EIC)
- Minor Electrical Installation Works Certificate (MEIWC)
- Electrical Installation Condition Report (EICR)
- Domestic Visual Condition Report (DVCR)
- Electrical Danger Notification (EDN)

**The following unbranded (green) forms are also available:**

- Electrical Installation Certificate (EIC)
- Minor Electrical Installation Works Certificate (MEIWC)
- Electrical Installation Condition Report (EICR)

These will be listed in more detail below for each type of form.

## **Forms no longer available for *BS 7671:2018+A2:2022***

**The following forms will no longer be available:**

- ELECSA branded forms due to the imminent ELECSA brand retirement
- Domestic Electrical Installation Certificate (Small installations up to 100 A single phase supply) have been discontinued due to the form being incorporated in to one form for single and multiphase installations
- Domestic Electrical Installation Condition Reports (Small installations up to 100 A single phase supply) have been discontinued due to the form being incorporated in to one form for single and multiphase installations

## Other important changes for BS 7671:2018+A2:2022

Due to the additional requirements of BS 7671:2018+A2:2022 the following changes have been introduced in to the model forms:

- Circuit Details and Test Results page has increased and now covers two pages; this is due to the additional requirement for information to be recorded, for example for additional information required for RCD's and the like, as well as giving more space to record information such as circuit description
- The Electrical Installation Certificate has had the Schedule of Items inspected significantly reduced to overall areas that require inspection. However it is important to remember that all relevant inspections as required by BS7671 must be undertaken
